The table shows a sample of the many different applications of the 1,260 and 1,290 "year-days" from Joachim of Floris in 1195 to John Aquila Brown in 1823. It would have been easy to extend the table to include expositors after Brown. However, the table ends with him because at this time another interpretation of the Gentile times began to surface, in which the 1,260 years were doubled to 2,520 years.
